

CAPSTONE/THESIS ORAL EXAMINATION COMMENTS SHEET

Proposal

Final

Capstone/Thesis title : **CARAGA HERITAGE SITES AND TOURISTS SPOTS INTERACTIVE MAP PORTAL**
Proponents : **CRISTIAN JAY BUQUIZ, RODEDLIZA BURDEOS, LOWIE VINCENT CANONIGO**
Department : **DEPARTMENT OF INFORMATION SYSTEMS**
Defense date : **MAY 21, 2024**
Adviser : **JABEZ IAN CHRIS D. PENALVER**

Comments	Page reflected
<ul style="list-style-type: none"> Are there any current solution that addresses the problem? What would be the difference between using Google Maps and your proposed solution? What can your application offer which is not included in the google map api? Define/Expound the discussion on the methods. How will the researchers implement the 360 & 3GS? How many tourist spots do the researchers intend to use? Define 'local' in the researchers' paper. Provide scope for the tourist spots and provide basis as to why it is chosen by the researchers. What would be the methods that the researchers will use to capture images? 	<p>- Chapter 1</p> <p>- Chapter 3</p> <p>- Chapter 1</p> <p>- Chapter 3</p>

<ul style="list-style-type: none"> Who is the main beneficiary of this application? Where will this application be deployed? Suggests that instead of usability scale, how about use the user acceptance? The direction of this research is not clearly established. Why not use/create another application where the DOT of that area inputs the data? What did other places with higher tourism do? That Caraga did not implement? - Suggest to add a discussion. Provide additional RRL on the generalization of the 360 output. In chapter 3, provide functional requirements and who are the proposed users of this application. 	<p>- Chapter 1</p> <p>- Chapter 3</p> <p>- Chapter 1</p> <p>- Chapter 3</p>
